Product Description	Bedside cribs made from beech plywood, beech and painted MDF, featuring a lift off bassinet and a rocking stand. Within the bassinet there is a fabric bag to create the sleeping area with mesh window sides and solid fabric end pieces with a foam mattress sitting within the fabric bag. Crib features a zip down half wall on one is for use when in bedside sleeping mode. The stand is height adjustable to fit the parent's bed height, securely attached to the bed base with the provided straps for when used for bedside sleeping. There are castor wheels which can be added to the product for portability. Removing/adding one set of casters (wheels must be in locked position) can be used to create an incline if the child has reflux, in standalone mode only with the zip closed/zipped up.
